

**Cisco Certified Network Associate Exam** 

Questions & Answers Demo

# Version: 67.0

## Question: 1

Which two actions must you take to correctly configure PPPOE on a client?

- A. Define a dialer interface.
- B. Create a BBA group and link it to the dialer interface
- C. Create a dialer pool and bind it to the physical interface
- D. Create a dialer pool and bind it to the virtual template
- E. Define a virtual template interface

**Answer: AD** 

### Question: 2

An administrator is trying to ping and telnet from SwitchC to RouterC with the results shown below. SwitchC> SwitchC> ping 10.4.4.3 Type escape sequence to abort. Sending 5, 100-byte ICMP Echos to 10.4.4.3, timeout is 2 seconds: U.U.U Success rate is 0 percent (0/5) SwitchC> SwitchC> telnet 10.4.4.3 Trying 10.4.4.3 ... % Destination unreachable; gateway or host down SwitchC>

Click the console connected to RouterC and issue the appropriate commands to answer the questions.

<output omitted>

Which will fix the issue and allow ONLY ping to work while keeping telnet disabled?

A. Correctly assign an IP address to interface fa0/1.

- B. Change the ip access-group command on fa0/0 from "in" to "out".
- C. Remove access-group 106 in from interface fa0/0 and add access-group 115 in.
- D. Remove access-group 102 out from interface s0/0/0 and add access-group 114 in
- E. Remove access-group 106 in from interface fa0/0 and add access-group 104 in.

Answer: E

Explanation: Let's have a look at the access list 104: access-list 104 permit tcp any any eq ftp access-list 104 permit tcp any any eq ftp-data access-list 104 deny tcp any any eq telent access-list 104 permit icmp any any echo access-list 104 permit icmp any any echo-reply access-list 104 permit ip any any

The question does not ask about ftp traffic so we don't care about the two first lines. The 3rd line denies all telnet traffic and the 4th line allows icmp traffic to be sent (ping). Remember that the access list 104 is applied on the inbound direction so the 5th line "access-list 104 deny icmp any echo-reply" will not affect our icmp traffic because the "echo-reply" message will be sent over the outbound direction.

### Question: 3

Refer to the diagram.

All hosts have connectivity with one another. Which statements describe the addressing scheme that is in use in the network? (Choose three.)

- A. The subnet mask in use is 255.255.255.192.
- B. The subnet mask in use is 255.255.255.128.
- C. The IP address 172.16.1.25 can be assigned to hosts in VLAN1
- D. The IP address 172.16.1.205 can be assigned to hosts in VLAN1
- E. The LAN interface of the router is configured with one IP address.
- F. The LAN interface of the router is configured with multiple IP addresses.

Answer: B, C, F

#### **Question: 4**

Which three encapsulation layers in the OSI model are combined into the TCP/IP application layer? (Choose three)

A. transport

- B. application
- C. session
- D. presentation
- E. data link
- F. network

**Answer: BCD** 

### Question: 5

Which two statements about NTP operations are true? (Choose two )

A. NTP uses UDP over IP

- B. NTP uses TCP over IP
- C. Cisco routers can act only as NTP clients
- D. Cisco routers can act as both NTP authoritative severs and NTP clients
