Exam E05-001

Information Storage and Management Version 3 Exam

Verson: Demo

[Total Questions: 10]

Question No : 1

Which action takes place during the login phase in an FCoE SAN?

- A. VN_Ports obtain FC addresses
- B. Nodes locate the Fibre Channel Forwarder
- C. Initialization protocol starts transporting FC data
- D. VN_Port to N_Port pairing is established

Answer: A

Question No : 2

Which fabric login type occurs between two N_Ports to exchange FC-4 upper layer protocol-related parameters?

- A. PRLI
- B. FLOGI
- C. PLOGI
- D. WWNN

Answer: A

Question No : 3

What keeps the name server up-to-date on all switches in a fabric?

- A. SW-RSCN
- B. Management server
- C. Zoning
- D. FLOGI

Answer: A

Question No : 4

Which data center characteristic ensures that data is stored and retrieved exactly as it was

received?

- A. Data integrity
- B. Security
- C. Scalability
- D. Manageability

Answer: B

Question No : 5

Which elements are associated with an object in an object-based storage system?

- A. Data, metadata, object ID, and attributes
- B. LUN ID, data, metadata, and object ID
- C. Metadata, object ID, attributes, and file path
- D. Object ID, attributes, LUN ID, and file path

Answer: A

Question No : 6

Which component of a software-defined storage (SDS) environment manages and provisions storage?

- A. SDS controller
- B. REST API
- C. SDS web service
- D. Storage agent

Answer: A

Question No : 7

An application generates 8400 small random I/Os at peak workloads with a read/write ratio of 2:1. What is the disk load at peak activity for a RAID 5 configuration?

- A. 4800
- B. 11200
- C. 16800
- D. A.22400

Answer: C

Question No : 8

Which process groups multiple physical drives and presents them to a compute system as a single logical volume?

- A. Concatenation
- B. Partitioning
- C. Striping
- D. Orchestration

Answer: A

Question No : 9

What accurately describes link aggregation in a SAN?

- A. Combines two or more parallel interswitch links into a single logical interswitch link
- B. Aggregates the data transmission rate of all HBA and storage system port pairs
- C. Consolidates compute-to-compute traffic and storage traffic into a single interswitch link
- D. Replaces multiple parallel interswitch links by a single physical interswitch link

Answer: A

Question No : 10

Which type of LUN provides full control for precise data placement and allows an administrator to create LUNs on different RAID sets if there is workload contention?

- A. Traditional
- B. Thin

C. Journal

D. Bitmap

Answer: A
