## Exam HPE0-J78

### Delta - Designing HPE Enterprise Storage and Backup Solutions

Version: Demo

**[ Total Questions: 10 ]**

**Question No : 1**

Which statement is true about HPE StoreVrtual Network RAID functionality?

- A. 10+2 configuration enables Network RAID.
- B. Redundancy is managed on a per-volume basis.
- C. Volumes remain available if an odd number of nodes are available
- D. Failover Manager increases the availability of the redundancy level

**Answer: A**

**Question No : 2**

Which HPE SPAR storeServ feature provides non-disruptive software upgrades without relying on multi-path software?

- A. HPE 3PAR Dynamic Optimization
- B. HPE 3PAR Persistent Ports
- C. HPE 3PAR MPIO
- D. HPE SPAR Access Guard

**Answer: A**

**Question No : 3**

An HPE StoreServ system is being evaluated in a proof-of-concept. The and other issues What do you need to configure?

- A. local notification service
- B. Collector Server
- C. real-time alert processing
- D. Secure Service Agent

**Answer: C**

**Question No : 4**

A customer has some mission-critical applications that intermittently experience heavy disk I/O during the month. The speed of the storage has the most impact on the performance.

## HP HPE0-J78 : Practice Test

---

The customer does not want to dedicate expensive SSD disks to these applications, since they only need this additional performance periodically, and moving the volumes from slow-to-fast-to-slow storage is a lengthy process

Which HPE StoreVirtual feature can address this customer's challenge?

- A. Adaptive Optimization
- B. Peer Motion
- C. Space Reclamation
- D. Remote copy

**Answer: A**

### Question No : 5

When discussing thin deduplication on HPE 3PAR StoreServ, how can you demonstrate the potential savings it can bring to your customer on a per virtual volume basis?

- A. Use the Dedupe Estimate in the HPE 3PAR management console and select the relevant Volumes.
- B. Use the thin Reduplication factoring tool on the HPE Support website
- C. Use the Ninjabars tool to import and analyze the array.
- D. Use the HPE StorageWorks sizing tool and select deduplication for the volume type

**Answer: A**

### Question No : 6

What is a business benefit of HPE hyper-converged system deployment?

- A. lower latency
- B. fewer choices
- C. faster deployment
- D. larger footprint

**Answer: C**

### Question No : 7

Which SAN topologies offer the highest centralized data access performance? (Select

Two.)

- A. cascaded
- B. ring
- C. core-edge
- D. meshed
- E. single switch

**Answer: B,C**

**Question No : 8**

A customer wants you to expand an HPE StoneVirtual cluster with two additional nodes. What do you need to consider?

- A. Nodes must be of equal or greater capacity compared to the existing nodes in a cluster
- B. The expansion needs downtime to re-balance the resources within the cluster
- C. The new nodes must be configured into a new management group.
- D. The firmware of the new nodes must match the version running in the cluster before adding them

**Answer: A**

**Question No : 9**

in an HPE StoreVirtual environment, the storage administrator receives alerts related to the Manage and Quorum configuration. The administrator wants to add two storage systems to the current management group, for a total of six storage systems configured in the cluster

How many managers are needed for this configuration?

- A. three
- B. four
- C. five
- D. six

**Answer: D**

**Question No : 10**

---

## HP HPE0-J78 : Practice Test

---

Which HPE 3PAR StoreServ feature can be used to address the customer issue of disruptive firmware updates?

- A. Gen5ASIC
- B. Persistent Cache
- C. Persistent Port
- D. Full-mesh Cluster interconnect

**Answer: C**
