Question: 14  A work authorization system can be used to:  A. Manage who does each activity. B. Manage when and in what sequence work is done. C. Manage when each activity is done.	Answer: B

A project team member tells you that she went to her project manager with a good idea for a useful

change to the project. Instead of giving her approval to make the change, the project manager asked her to write a report describing the benefits of the change. What is the MOST appropriate advice for the situation?

- A. The project manager is being unreasonable and should do that kind of work herself.
- B. Remind the project manager that the benefit cost analysis for the project was done during project planning.
- C. A project manager must be able to weigh the benefits of the change versus the costs and compare them to other possible changes. The team member should do what was asked.
- D. The team member should do what was asked because this sort of information must be given to the project sponsor to make the change.

Answer:	С
