

Palo Alto Networks

PSE-SASE Exam

Palo Alto Networks System Engineer Professional - SASE

**Questions & Answers
Demo**

Version: 4.0

Question: 1

A customer currently uses a third-party proxy solution for client endpoints and would like to migrate to Prisma Access to secure mobile user internet-bound traffic.

Which recommendation should the Systems Engineer make to this customer?

- A. With the explicit proxy license add-on, set up GlobalProtect.
- B. With the mobile user license, set up explicit proxy.
- C. With the explicit proxy license, set up a service connection.
- D. With the mobile user license, set up a corporate access node.

Answer: B

Explanation:

Question: 2

What is a benefit of deploying secure access service edge (SASE) with a secure web gateway (SWG) over a SASE solution without a SWG?

- A. A heartbeat connection between the firewall peers ensures seamless failover in the event that a peer goes down.
- B. It prepares the keys and certificates required for decryption, creating decryption profiles and policies, and configuring decryption port mirroring.
- C. Protection is offered in the cloud through a unified platform for complete visibility and precise control over web access while enforcing security policies that protect users from hostile websites.
- D. It creates tunnels that allow users and systems to connect securely over a public network as if they were connecting over a local area network (LAN).

Answer: C

Explanation:

Question: 3

Which action protects against port scans from the internet?

- A. Apply App-ID Security policy rules to block traffic sourcing from the untrust zone.
- B. Assign Security profiles to Security policy rules for traffic sourcing from the untrust zone.
- C. Apply a Zone Protection profile on the zone of the ingress interface.
- D. Assign an Interface Management profile to the zone of the ingress surface.

Answer: C

Explanation:

Question: 4

Which product continuously monitors each segment from the endpoint to the application and identifies baseline metrics for each application?

- A. App-ID Cloud Engine (ACE)
- B. Autonomous Digital Experience Management (ADEM)
- C. CloudBlades
- D. WildFire

Answer: B

Explanation:

Question: 5

Which application gathers health telemetry about a device and its WiFi connectivity in order to help determine whether the device or the WiFi is the cause of any performance issues?

- A. data loss prevention (DLP)
- B. remote browser isolation (RBI)
- C. Cortex Data Lake
- D. GlobalProtect

Answer: C
